

# SKYVIEW

Take your seat in the air and experience a view from the sky like never before. SKYVIEW is an enclosed FPV headset specially designed to work with TYPHOON H and TORNADO H920. SKYVIEW lets you focus on creating the best possible shot. As you operate the camera you see exactly what the Multicopter sees, just as if you are on board. SKYVIEW also works with any device that has an HDMI output. Connect to the device, put on the headset, and you are immersed in your own virtual reality experience, ideal for many exciting applications such as games and movies.

**Head Strap**

Flexible and adjustable head bands for a comfortable fit.

**USB Port**

Charge your SKYVIEW convenient at any USB charging output (PC or wall adaptor).

**5" HD Screen**

The single HD screen provides a brilliant picture of your virtual reality experience.

**Earphone Port**

Use the HDMI connection to bring sound to your SKYVIEW goggles without the need of a separate connection to your device. Simply plug in your earphones using the provided socket.

**HDMI Port**

Easy connect SKYVIEW to any device with an HDMI output

Keep your glasses on using SKYVIEW for an experience like never before.

Easy to reach power button to switch your SKYVIEW on or off.

The soft padding and lightweight design of SKYVIEW provide great comfort wearing your goggles.
